

## NEWS RELEASE

### PUMPING SERVICES JOB

---

S.C.O.R.E. Limited performed their first pumping services job for YARA Trinidad Limited and Trinidad Nitrogen Company between November and December 2007.

S.C.O.R.E. management were notified in the middle of the night by YARA Senior Engineers requesting pumping equipment. They asked us to provide our pumping services equipment for circulating water at high rates through their Ammonia plant cooling towers.

We mobilized our operations personnel, one new 6" high rate centrifugal pump from our supplier, fittings and hoses, and within a couple hours we were facilitating our pumping services to our client at their Point Lisas plant.

The project duration was very extensive, as our crews and equipment had to perform twenty-four hours per day with personnel taking shifts. The pumping rates were in excess of 1500gpm. In the end the client stated they were very pleased with our equipment and support.

We remain committed to providing affordable, top quality equipment and service for our clients in the oil and industrial sectors of Trinidad and Tobago.
