SSV/SCSSV REMOTE WELL CONTROL PANEL

SSV/SCSSV Well Control Remote Control Equipment

This unit is used during down hole operations for running long bottom hole assemblies (Screens, Blank Pipe, etc) to give the operator control in the immediate vicinity of work area and allows operator full control to access and call the shots, If Well Control Problems Arise!

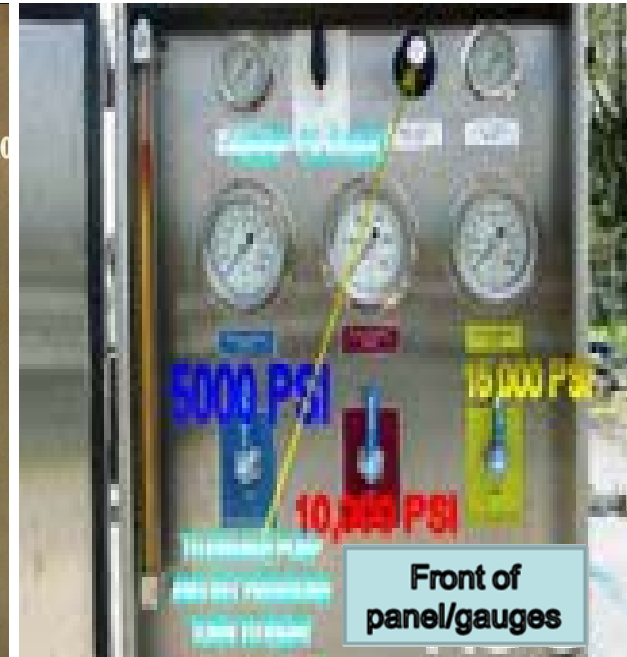

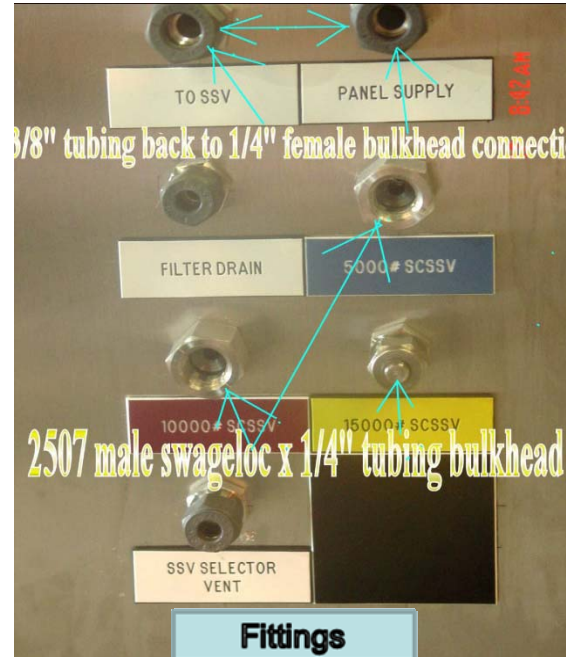

- Provides on-site Surface Safety Valve/Surface Controlled Subsurface Safety Valve monitoring and control during coiled-tubing, snubbing, wireline, and/or well testing.
- Immediate Control Right at Operator's Unit.
- Cost effective, time saving and reduces labour when pulling & inserting wireline retrievable safety valves.
- Quality, Safety, and Environmentally inspired insurance policy when doing thru-tree well servicing and/or well testing.

SSV/SCSSV Remote Control Equipment

- New 15K remote control unit available in Trinidad!
- Unit provides control and “real time” data for operator of C/T, W/L, Non-rig work-over or Snubbing unit at operator’s console for added safety.
- Uses environmentally friendly, non- hydrocarbon biodegradable hydraulic fluid no “*Sheen*” protection. Also air & hydraulic operated w/pump.
- Replaces use of hand pump and radio communication to control SCSSV at wellhead.
- Provides SSV control when fusible cap is not on or installed.
- Each remote control panel system has monitor gauge and is pressure *safety* valve protected.
- All connections are rated to 15,000# working pressure.
- Removable hinged door, sight glass for fluids level, large gauges for SCSSV control pressure,
- All Components are labeled, pressure safety valve, protected (5M-10M-15M) maintenance components. Autoclave & Parker Fittings, relief valve set at 15,000psi, hydraulic oil reservoir tank, air supply valve, connections & spare parts box and hand pump, if necessary.
- Units are packaged and shipped with all relevant QA/QC paperwork and certifications for lifting and slinging.
- Units are shipped to location in a specially designed aluminum storage box.

SSV/SCSSV Remote Control Equipment

Benefits:

- Recognized and appreciated by regulatory agencies and international operators.
- This equipment is field tested and proven and may save an expensive fishing job or other problems.
- Easy understandable operating instructions.
- Provides added Insurance and assurance for Oil & Gas Operators - SAFETY FIRST!
